

Environmental Policy

Kumera Corporation is a global technology and service provider for demanding industrial and marine applications. We are committed to conducting business responsibly and reducing environmental impact. This policy guides our operations across all markets and supports sustainable development and climate action.

Objective and Commitment

Kumera strives to reduce its environmental footprint and handprint and protect the environment and climate in all regions where we operate. We acknowledge the impact of industrial activities on natural resources and commit to enabling a sustainable transition for our customers and society.

Climate Action and Science-Based Targets

- Science Based Targets (SBT): Kumera aligns its emission reduction goals with the Paris Agreement's 1.5 °C target.
- Near-term Target (2030): Reduce greenhouse gas emissions by 50% from the 2024 baseline.
- Long-term Target (2050): Achieve a 90% reduction in total emissions, moving toward net-zero.

Monitoring and Reporting

- GHG Protocol: Full Scope 1 and 2 reporting implemented by 2025.
- VSME Standards: Develop sustainability reporting aligned with European expectations.

Circularity and Environmental Efficiency

- Promote efficient and circular resource use.
- Design solutions that improve customers' energy efficiency.

Value Chain Responsibility

- Require suppliers to comply with environmental standards.
- Conduct risk-based sustainability audits across the supply chain.

Implementation and Governance

Top management is responsible for the implementation of this policy, while each manager leads by example and promotes a strong environmental culture across the organization. We conduct regular evaluations to ensure effective implementation of the policy.
